Education

Vasantdada Patil Pratishthan's College of Engineering and visual arts) <div align="right">June 2026</div>
Bachelor of Engineering in Information Technology <div align="right">*CGPA: 7.4/10.00 (Till Sem V)*</div>

Technical Skills

Languages: JavaScript, Java, Python(basic), C
Databases & Tools: SQL, MongoDB, Git, GitHub, VS Code, Canva
Frameworks: MERN Stack, Express.js, Node.js
Frontend & UI/UX: HTML, CSS, React.js
Soft Skills: Team Leadership, Project Management, Problem Solving

Projects

StudyNotion - E-Learning Platform <div align="right">**Ongoing**</div>
MERN Stack, Payment Integration, Video Streaming
− Built a Udemy-like e-learning platform using MERN stack with comprehensive course management system.
− Implemented secure user authentication, course creation, and video streaming capabilities.
− Integrated payment gateway for seamless transaction processing and course enrollment.
− Designed responsive UI for optimal user experience across all devices.

Climate News Aggregator <div align="right">**Completed**</div>
MERN Stack, API Integration
− Developed a web application that aggregates climate-related news from various sources using APIs.
− Created a centralized platform providing users with real-time environmental updates.
− Implemented efficient data fetching and display mechanisms also with voice functionality for enhanced user experience.

E-commerce Platform - RS Enterprises <div align="right">**Completed**</div>
MERN Stack, Payment Integration, Inventory Management
− Developed a full-featured e-commerce website for RO and water purifier filters.
− Implemented secure payment processing and inventory management system.
− Created user-friendly interface with shopping cart, product catalog, and order tracking.

Work Experience

MERN Developer - Edunet Foundation <div align="right">**Feb 2025 – Mar 2025**</div>
Full Stack Development
− Developed and optimized web applications using modern technologies, enhancing product performance and scalability.
− Contributed to both frontend and backend feature development for client projects.

Web Development Intern - IBM CSRBOX <div align="right">**Jul 2024 – Aug 2024**</div>
Full Stack Development
− Designed and developed a climate news aggregation web application using APIs.
− Led a team to successfully deliver the project on time and within allocated timeline.
− Ensured efficient collaboration and task management throughout the development process.

Achievements

Quasar 2.0 Hackathon: Secured Merit Certificate Achieved Top 10 position out of 60 participating teams.

IBM Certification: Web Development certification validating technical skills.

HackerRank Certification: SQL Basic certification demonstrating database proficiency.

Google Cloud Arcade Jam: Completed cloud computing study jam and received certificate and some goodies
